NASTAD Prevention and Care TA Meeting: Advancing Health Equity
Wednesday, July 19, 2017

Shanell L. McGoy, PhD, MPH
HIV/STD Director
Tennessee Department of Health
NASTAD Chair

UNITE TO END THE EPIDEMICS
OUTLINE

Levels of Racism: A Theoretic Framework and a Gardener’s Tale

Health Equity: Achieving Health Equity among Key Populations

Chair’s Challenge: *Unite to End the Epidemics*

**Priority Area 1:**  
Core Competencies  
Scale Up

**Priority Area 2:**  
Strengthening Partnerships

**Priority Area 3:**  
Mission-Driven Investments
Institutionalized racism
Material Conditions
Access to Power

Personally mediated racism
Prejudice
Discrimination

Internalized Racism
Acceptance by members of the stigmatized races of negative messages about self

“...the gardener is the one with the **power to decide**, the **power to act**, and the **control over the resources**. ... the gardener is our government. ... there is particular danger when this gardener is not concerned with equity. ... how can we get the gardener to own the whole garden and not be satisfied when only the **red flowers thrive**?”

Equality
Equity
Lifetime Risk of HIV Diagnosis

For immediate release: February 23, 2016

Contact: National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention
(404) 639-8895 | NCHHSPTMediaTeam@cdc.gov

Half of black gay men and a quarter of Latino gay men projected to be diagnosed within their lifetime

If current HIV diagnoses rates persist, about 1 in 2 black men who have sex with men (MSM) and 1 in 4 Latino MSM in the United States will be diagnosed with HIV during their lifetime, according to a new analysis by researchers at the Centers for Disease Control and Prevention (CDC). The study, presented today at the Conference on Retroviruses and Opportunistic Infections in Boston, provides the first-ever comprehensive national estimates of the lifetime risk of an HIV diagnosis for several key populations at risk and in every state.
Health Equity = Everyone has a fair opportunity to live a long and healthy life.
2017-2018 CHAIR’S CHALLENGE: UNITE TO END THE EPIDEMICS
PRIORITY AREA 1:

CORE COMPETENCIES

SCALE UP
64% of jurisdictions (29 out of 45) rated above the national average for funding for HIV-related interventions.

BUT

Only 46% of jurisdictions (22), slightly less than half of respondents, rated above the national average for collecting & using SOGI data.
Core Competencies Index Markers

Stigma & Discrimination

60% of jurisdictions (27) rated above the national average for engaging strategies to address stigma and discrimination.

But

Only 31% of jurisdictions sponsored regular health literacy training for all health department & provider staff. Less frequently cited examples of PLWH in mental health and drug treatment programs.
Priority Area 2: Strengthening Partnerships
TELLING OUR SUCCESS STORIES
PRIORITY AREA 3:
MISSION-DRIVEN INVESTMENTS
MISSION DRIVEN INVESTMENTS
WE'RE ALL PART OF A GLOBAL COMMUNITY
Scaling up core competencies

Investments in our work

Opportunity not obstacle

Governmental public health united
