THE TIME IS NOW END THE EPIDEMICS
FEDERAL GOVERNMENT INITIATIVE TO END HIV BY 2030

Ending the HIV Epidemic: A Plan for America

February 2019

The Initiative will target our resources to the 48 highest burden counties, Washington, D.C., San Juan, Puerto Rico, and 7 states with a substantial rural HIV burden.

GOAL:

75% reduction in new HIV infections in 5 years and at least 90% reduction in 10 years.

HIV Education will establish local teams committed to the success of the initiative in each jurisdiction.

Diagnose all people with HIV as early as possible after infection.

Treat the infection rapidly and effectively to achieve sustained viral suppression.

Protect people at risk for HIV using potent and proven prevention interventions, including PrEP, a medication that can prevent HIV infections.

Respond rapidly to detect and respond to growing HIV clusters and prevent new HIV infections.

HIV HealthForce will establish local teams committed to the success of the initiative in each jurisdiction.
