

# ADAP is improving health outcomes in 3 important ways:

## 1. ENGAGEMENT IN CARE

**262,605** clients enrolled

**87%** client utilization

Clients served by ADAP (receiving medications) in FY2014

**84%** client retention

Clients successfully recertified twice in a 12-month period by ADAP

This means an **OPTIMAL** health outcome for clients: **72%** of all clients served reported a **suppressed viral load\***

**87% of clients served by an ADAP-funded insurance program reported a suppressed viral load.**

\*over a 12-month period by ADAP

## 2. CLIENT ENROLLMENT & COMPOSITION

Improving retention in care

ENROLLMENT

**258,469** clients enrolled  
**16%** were new (40,921)

COMPOSITION

**238,253** clients served...

by an ADAP-funded insurance program ONLY: **33%**  
by an ADAP full-pay prescription program ONLY: **60%**  
by both: **7%**

ENROLLMENT

**262,605** clients enrolled  
**16%** were new (42,866)

COMPOSITION

**229,672** clients served...

by an ADAP-funded insurance program ONLY: **32%**  
by an ADAP full-pay prescription program ONLY: **48%**  
by both: **20%**

## 3. INVOLVEMENT IN NEW HEALTH COVERAGE

The ACA, including the Marketplace and Medicaid expansion, have enabled ADAPs to better serve their clients.

ACA COVERAGE

**29,341**

Enrolled in more comprehensive care through an ACA Marketplace Qualified Health Plan or Medicaid

MEDICAID

**45,340**

Number of clients served in June 2015 with incomes below 138% of FPL who live in a non-Medicaid expansion state\*

\* These clients would be eligible to transition to Medicaid if their state chose to expand Medicaid eligibility.

For more information on ADAP and state-specific ADAP data, please check out the 2016 National ADAP Monitoring Project Annual Report [here](#).
